SUMMARY

Motivated Cybersecurity student with a strong foundation in network security, security monitoring, threat detection and incident response. Hands-on experience with Wireshark, tcpdump, Nmap, Suricata and VirusTotal for network analysis, security monitoring and threat investigation. Experienced in developing machine learning-based cybersecurity solutions and passionate about identifying vulnerabilities and building secure systems. Seeking an entry-level Cybersecurity or SOC Analyst role to apply technical skills and contribute to a security-focused team.

SKILLS

Programming Languages

- Python, SQL, Java, C++
- **Basic:** HTML, CSS, JavaScript, ReactJS

Cybersecurity & Networking

- Network Traffic & Packet Analysis: Wireshark, tcpdump
- Network Scanning & Enumeration: Nmap
- Security Monitoring & IDS: Suricata
- Incident Response, Threat Detection & Linux Fundamentals

PROJECTS

1. PhishGuard – AI-Powered Real-Time Phishing Detection System

- Developed a Chrome extension for real-time phishing detection across Gmail and WhatsApp Web using Machine Learning and rule-based analysis.
- Built a detection pipeline using TF-IDF, XGBoost and cybersecurity features including URL count, keyword indicators and character patterns.
- Developed a FastAPI REST API for real-time ML prediction and integrated it with the Chrome extension.
- Implemented hybrid detection combining ML predictions and rule-based analysis to identify suspicious messages and assign risk levels.

2. DDoS Attack Detection System

- Developed and evaluated a Machine Learning model to detect DDoS attacks using network traffic features.
- Performed data preprocessing and feature analysis to distinguish normal and malicious network traffic.
- Identified abnormal traffic patterns to support early detection of potential DDoS attacks.

CERTIFICATES

- [Google Cybersecurity Professional Certificate](#)
- [Bits and Bytes of Computer Networking](#)
- [AWS Certified Cloud Practitioner \(CLF-C02\)](#) — [AWS Cloud Practitioner Essentials](#)
- [AWS Technical Essentials](#)

TECHNICAL EXPERIENCE

- Performed network traffic and packet analysis using Wireshark and tcpdump in cybersecurity lab environments.
- Conducted network scanning and service enumeration using Nmap on authorized test environments.
- Monitored network traffic and investigated suspicious activity using Suricata.
- Analyzed phishing and malicious indicators using VirusTotal in cybersecurity projects.

EDUCATION

Vellore Institute of Technology, Bhopal

Expected Graduation: 2027

B.Tech, Computer Science and Engineering (Cybersecurity & Digital Forensics)

CGPA: 8.26 — XII: 74.8% — X: 85%

Relevant Coursework: DSA, DBMS, OS, Computer Networks, Ethical Hacking, Digital Forensics, Data privacy
